

# SURVEILLANCE UPDATE

## Maternal Drinking During Pregnancy: 2006 N.C. Pregnancy Risk Assessment Monitoring System

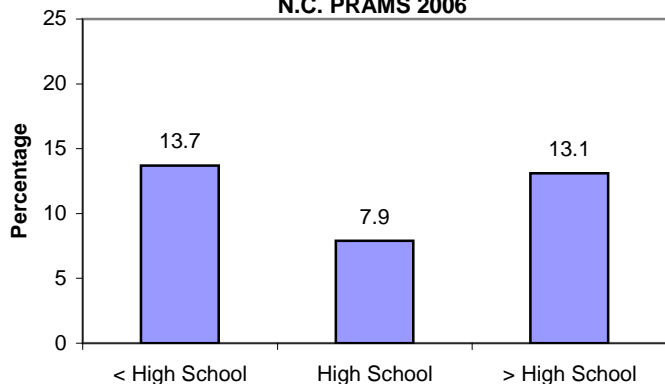

Percentage of N.C. pregnant women who had more than one alcoholic drink per week during the last 3 months of pregnancy, by age group:  
N.C. PRAMS 2006

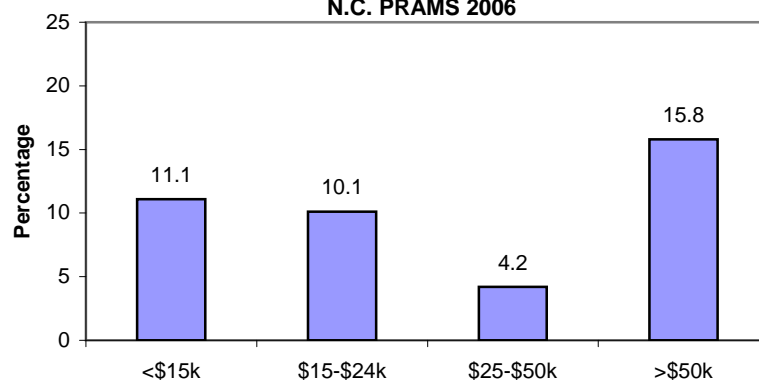

Percentage of N.C. pregnant women who had more than one alcoholic drink per week during the last 3 months of pregnancy, by race/ethnicity: N.C. PRAMS 2006

Percentage of N.C. pregnant women who had more than one alcoholic drink per week during the last 3 months of pregnancy, by educational attainment:  
N.C. PRAMS 2006

Percentage of N.C. pregnant women who had more than one alcoholic drink per week during the last 3 months of pregnancy, by income level:  
N.C. PRAMS 2006

All estimates are weighted to reflect the entire population of N.C. women who gave birth in 2006. Excluded from the sampling frame are births to N.C. residents that took place out of state, those where the birth certificate did not contain the mother's last name, multiple births of 4 or more, and birth to mothers under the age of 13. Mothers who reported having one or more alcoholic drink per week during the last three months of pregnancy.

The N.C. Pregnancy Risk Assessment Monitoring System (N.C. PRAMS), is a Centers for Disease Control and Prevention (CDC) initiative to reduce infant mortality and low birth weight. N.C. PRAMS is a random, stratified, monthly mail/telephone survey of N.C. women who recently delivered a live-born infant. Each month, a sample of approximately 200 women with recent live-born deliveries is drawn from the Provisional Birth File. Every year a core set of questions is asked of these women before, during and after pregnancy. The data that PRAMS collects strives to improve the health of infants and mothers, especially as it is used for planning and assessing health programs, can be used to identify groups of women and infants at high risk for health problems, to monitor changes in health status, and to measure progress towards goals in improving the health of mothers and infants. See the N.C. PRAMS website for more information, specific details on item responses, and data limitations: <http://www.schs.state.nc.us/SCHS/prams>.
